

**Sun screen stains
just don't rub away!**

MULAN SOLAR

Unique degreaser for the removal of sun screen stains

- **Concentrated degreaser, allowing easy removal of persistent sun screen stains**
- **Improves whiteness**
- **Significantly reduces rewash and saves money**

MULAN SOLAR

Background

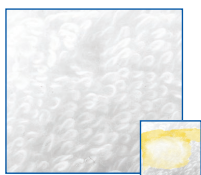

In 2009, the cosmetic regulation for sun screens changed: the concentrations and UV filter needed to be reformulated in order to offer more protection. As UV filters block the light, higher concentrations of the filters prevent the optical brighteners from working. This results in stains on the textile. (Under artificial light, these stains look dark).

The stains are very difficult to remove in a normal washing process, so rewash rates are high. The development of the revolutionary MULAN SOLAR brought a change to this.

Mode of action

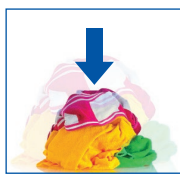

Thanks to a carefully formulated mixture of ingredients, MULAN SOLAR removes the sun screen stains from the textile, including the UV-filter. This leads to :

Easy stain removal

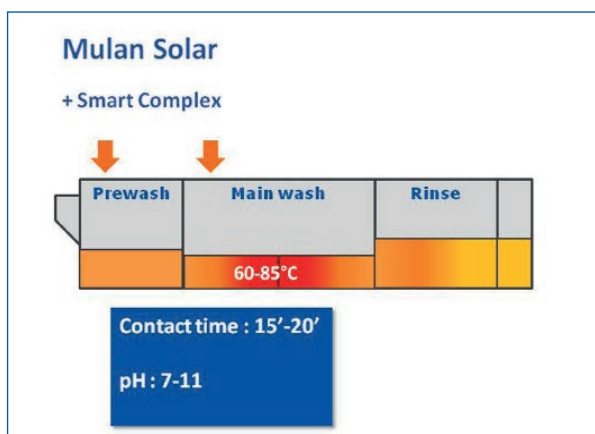

Improved whiteness

Reduced rewash

Application

- MULAN SOLAR is integrated in the washing process (no prespotting)
- The product is used in combination with a sequestrant booster, type Smart Complex
- MULAN SOLAR can be used both in washer extractor and in tunnel washer

Packaging & use

- Packaging : drums (200 KG)
- Temperature :
 - storage >0°C,
 - dosage > 5°C
- Dosage :
 - Mulan Solar : 10-20 g/kg, in combination with
 - Smart Complex : 1-5 g/kg

Benefits

- Excellently removes persistent sun screen stains
- Significantly reduces the rewash rate → saving time & money
- Improves the whiteness of the towels
