FLOOR CLEANING CONCEPT

EASY, SAFE AND ERGONOMIC CLEANING

OPTIMISED WORK TIME

ENVIRONMENTALLY FRIENDLY

**CHRISTEYNS**

PROFESSIONAL HYGIENE

# FLOORIT ERGON

Many people nowadays make a living from cleaning, as the demand for maintenance and cleaning services are everpresent and constantly evolving. With over 75 years of experience in professional cleaning, detergent manufacturer Christeyns constantly strives at improving the working conditions in this difficult occupation.

## THE CONCEPT

FLOORIT ERGON is a revolutionary floor cleaning concept designed to make daily floor cleaning easy, ergonomic and environmentally friendly at the same time.

FLOORIT ERGON optimises the working time, reduces detergent and disinfectant consumption and eliminates the discharge of dirty water in the sewer networks.

The concept consists of

- a **cleaning device** with special perforating compartment
- a **mop pad**
- **detergent / disinfectant pouches** with ready-to-use solution

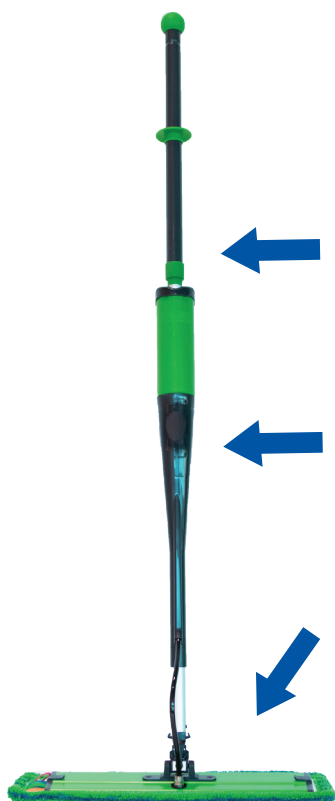

## HOW DOES IT WORK?

1. The detergent or disinfectant pouch is placed in the special **perforating compartment**, where it gets punctured.
2. The pouch **releases** 220 ml of ready-to-use solution, which flows to the mop pad. A surface of +/- 40m<sup>2</sup> can be cleaned with one pouch
3. The **diffusion tray** evenly impregnates the mop pad.
4. The solution dries fast and leaves no marks. There is **no need to rinse**

## CLEANING DEVICE

### ERGONOMY

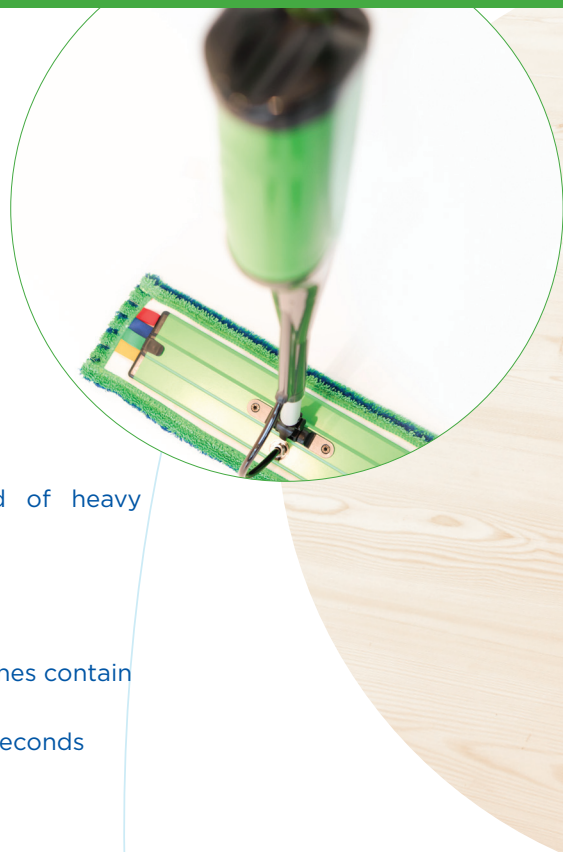

Telescopic handle 120-160 cm  
Individual cleaning pouches instead of heavy buckets

### EASE-OF-USE

No need to prepare the product, pouches contain ready-to-use solution  
Solution flows down to mop pad in 7 seconds

### PRECISION

High quality diffusion tray, providing a good and even impregnation of the mop pad.

## CLEANING PRODUCTS

### DAILY CLEANING :

#### GREEN'R FLOORS RTU

EU-ecolabelled floor cleaning product.

**Green'R Floors** is suitable for regular use and makes your floors and surfaces shine. Works quickly without leaving traces and leaves a fresh floral scent.

### DAILY CLEANING :

#### GREEN'R SANIFLOORS RTU

EU-ecolabelled sanitary floor cleaner.

**Green'R SaniFloors** is suitable for regular use. It eliminates limescale, makes your sanitary floors shine, has a fresh scent and does not leave marks.

### DISINFECTION :

#### PHAGO'GERM + RTU

Disinfectant for the cleaning and disinfection of floors in hazardous environments.

**PhagoGerm +** can be used for daily maintenance of the premises.

- Pouches of 220 ml of ready-to-use solution
- 20 pouches in one recyclable cardboard box, allowing up to 800m² of quality cleaning.
- No need to rinse, so no discharge of dirty water in the sewers

## MOP PAD

Specifically suitable for the FLOORIT ERGON cleaning device, this mop pad can be used for both cleaning and disinfecting. It can absorb 2,7 times its weight, being 220ml of solution.

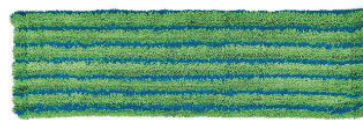

It is woven with three materials, each with unique properties :

- 100% **microfiber** loops to catch the dust
- 100% **polyester** loops for the absorption
- 100% **polypropylene** loops for the mechanical action

Weight : 96g dry and 300g wet

Dimensions : 460mm x 140mm

**The mop pads need to be washed before first use.**

## MOPS WASH PROGRAMME

To keep your mops in good shape, it is important to wash them following an appropriate wash programme. Washing needs to be done with an easy-to-rinse product that leaves no residue on the loops. Otherwise this could interfere with the cleaning action.

### CHRISTEYNS RECOMMENDATIONS:

Prewash	without product	30°C
Drain		
Wash	neutral detergent : Green'R Ultra Wash	60°C
Rinse	3x at high level	cold
Dry spin	at high speed	

For detailed instructions, please consult your Christeyns representative.

## ACCESSORIES

### BELT

- A handy adjustable belt with pockets to carry the detergent pouches during cleaning.
- Holds up to 4 pouches.
- Waterproof pocket at the back for dirty pouches.

## CASE STUDIES

Case study carried out in French Bakery shop during 1 month.

### 1. TIME SAVINGS

Bakery shop & restaurant	Standard cleaning	FLOORIT ERGON cleaning
Total time: preparation-cleaning-80m <sup>2</sup> -storing away	14 min	6 min
N° of cleanings/day	3	3
Total time	42 min.	18 min.

**TIME SAVINGS  
24 MIN/DAY**

### 2. REDUCTION OF WATER CONSUMPTION

Bakery shop & restaurant	Standard cleaning	FLOORIT ERGON cleaning
Surface	80m <sup>2</sup>	80m <sup>2</sup>
N° of cleanings/day	3	3
Water used per cleaning	2 buckets of 4L	2 pouches of 220ml
Total (L)/day	24L	1,32L

**WATER SAVINGS  
22,68L/DAY**

### 3. WASTE WATER

Bakery shop & restaurant	Standard cleaning	FLOORIT ERGON cleaning
1m <sup>3</sup> of wastewater	contains 350g to 400g of mud	
Waste water	24L/day	0L/day
	8,76m <sup>3</sup> /year	0m <sup>3</sup> /year
Mud	8,76m <sup>3</sup> * 350g = 3,07kg/y	0m <sup>3</sup> *350g = 0kg/y

**LESS MUD  
-3 KG/DAY**

## WHAT'S IN IT FOR YOU?

### EASY & SAFE

- No need to measure exact quantity of cleaning product. One pouch = 220ml ready-to-use solution.
- No need to impregnate mops beforehand or to fill water buckets >> optimised work time
- No contact with the chemical >> safe system

### ERGONOMICS

- No need to fill & carry heavy buckets of water
- No need to handle heavy jerrycans of detergents
- Less musculoskeletal disorders
- Telescopic handle extending from 120cm to 160cm.

### ENVIRONMENT

- No need to rinse, so no discharge of dirty water in the sewers.
- No overdosing of cleaning products possible
- Green'R Floors and SaniFloors products are highly performing EU ecolabelled products.

#### DID YOU KNOW?

1m<sup>3</sup> of discharged waste water produces 350 to 400 grams of sludge? Millions of tons of dry matter need to be evacuated each year by the sanitation services.

With Floorit Ergon you prevent the cleaning solution from being discarded in sewers and you help to protect our planet.
