# CUBOX

**CUBOX** is Christeyn's bag-in-box packaging system, designed to make dishwashing efficient and easy. This compact, space-saving system also significantly reduces packaging waste.

A must-have in every industrial kitchen.

## CUBOX SYSTEM

CUBOX is not just an ordinary bag-in-box system. Unlike the pillow-shaped bags commonly found in the market, the CUBOX inner bag is cube-shaped, allowing optimal filling with our liquid chemicals.

To keep the box off the floor, it is combined with a stainless steel platform that can be wall-mounted and is inclined, allowing the product to be used down to the last drop. The bag can also be used without the outer box, in a dedicated stainless steel platform.

The system has an (optional) low level alarm and comes with a reusable CPC connector.

## EASY & SAFE TO USE

Our 10L CUBOX packagings are easy to carry, to install and to replace. The low level alarm (optional) warns the user when the box needs to be replaced.

1

1. Open the Cubox and place it on the rack

2

2. Remove the seal

3

3. Connect the CPC connector with the Cubox. You can start dosing.

Compared to standard canister packaging, the CUBOX system is simpler to handle, safer thanks to the connection and ergonomic thanks to the off-the-floor, wall-mounted rack and the carrying handles in the box.

## HIGHLY EFFICIENT

Thanks to the cubic shape of the inner bag, the bag is always perfectly positioned for optimal product release.

Combined with the sloping platform, **>99% of the product can be dispensed**, allowing maximum cost efficiency!

## SPACE-SAVING

Thanks to the square boxes that stack easily, **storage space** can be used much more **efficiently**.

Furthermore, there is no need to store empty canisters, the empty cubox packaging hardly takes up any space and can be recycled.

## ENVIRONMENTALLY FRIENDLY

The CUBOX system allows for **reductions of >80% in plastic waste volume** compared to standard 10L rigid canisters.

After use, both the cardboard box and the plastic bag can be **easily recycled**.

The CPC connector can be **re-used**.

## ECO-LABELLED PRODUCT RANGE

### (VERY) HARD WATER

Soft water

Hard water

Medium-hard water

Very hard water

## GREEN'R AUTODISH H ULTRA

### ALKALINE DISHWASHING DETERGENT FOR VERY HARD WATER

Cleans and degreases very effectively even the most stubborn soils at low concentrations.

Suitable for all water hardnesses.

10L cubox

## GREEN'R RINSE HC

### ACIDIC RINSING LIQUID FOR VERY HARD WATER

Particularly suitable for rinsing dishes in professional dishwashers, household-type dishwashers and glass washers.

Removes detergent residues and promotes the rapid drying of dishware without leaving traces and restores shine.

Formulated to obtain an antifoam action.

10L cubox

EU Ecolabel:  
BE/038/001

### SOFT TO MEDIUM HARD WATER

## GREEN'R AUTODISH S

### ALKALINE DISHWASHING DETERGENT FOR SOFT TO MEDIUM-HARD WATER

Cleans and degreases very effectively even the most stubborn soils at low concentrations.

Promotes removal of difficult stains.

10L cubox

## GREEN'R RINSE GC

### ACIDIC RINSING LIQUID FOR SOFT TO MEDIUM-HARD WATER

Particularly suitable for rinsing dishes in professional dishwashers, household-type dishwashers and glass washers.

Removes detergent residues and promotes the rapid drying of dishware without leaving traces and restores shine.

Formulated to obtain an antifoam action.

## DOSING SYSTEMS FOR MACHINE WARE WASHING

### TRIPLE DISHWASH PUMP

#### DIGITAL DOSING SYSTEM

- Up to 3 dosing pumps
- Suitable for all dishwashing machines
- Suited for detergent and rinse-aid dosing

### DOUBLE DISHWASH PUMP

#### ANALOGUE DOSING SYSTEM

- 2 pumps
- For single tank warewash machines with 1 valve only
- Suited for detergent and rinse-aid dosing
- Adjustable speed

### SINGLE DISHWASH PUMP

#### PERISTALTIC DOSING PUMP

- Analogue dosing system with single pumps
- Suited for detergent and rinse-aid dosing
- Adjustable speed
