

BPR REGISTERED

Multi-application BPR authorisation granted

PERACETIC ACID

Leading PAA producer with over 30 years' experience

- EXTENSIVE RANGE OF SAFE, STABLE PRODUCTS
- IN-HOUSE RESEARCH & DEVELOPMENT
- STRINGENT QUALITY CONTROL
- SUPPORT WITH PRODUCT REGISTRATION OPTIONS

FEEL OUR PASSION

CHRISTEYNS

Peracetic acid (PAA) is a higly effective antimicrobial agent due to its strong oxidising potential. It is effective against a wide range of microorganisms and can be used in a variety of applications. Its mode of action helps minimise the risk of microbial resistance.

CHRISTEYNS' EXPERTISE

Christeyns, a specialist in hygiene chemicals, is an established manufacturer of peracetic acid in Europe. With over three decades of expertise in producing this highly effective disinfectant, we have established ourselves as a trusted industry leader.

At Christeyns, we prioritise collaboration and maintain close ties with key industry associations such as CEFIC and IHO. Christeyns is also a **member of the Peracetic Acid Registration (PAR) Group**.

Our commitment extends to supporting peracetic acid as an active substance across a broad spectrum of Biocide Product Types (PT) and under the REACH framework. This expertise makes Christeyns a reliable partner for peracetic acid production.

Each year, we reliably manufacture a substantial volume of peracetic acid to meet the increasing demands of various industries and applications.

PRODUCTION

For the production of our peracetic acid products, Christeyns has a **dedicated, fully automated** plant which is certified to **ISO 9001** and **ISO 14001**.

We maintain high safety standards throughout production, manufacturing **high-purity PAA products** with long-term stability.

QUALITY CONTROL

From raw materials through to production, packaging and transportation of the final product, **rigorous quality control protocols** are in place throughout the process to ensure consistent product quality.

PRODUCT RANGE

Our portfolio includes a wide range of approved PAA products for use across various industries and applications, including disinfection, bleaching, food-grade technological aids, water treatment and medical devices.

We can develop **tailor-made products** upon request.

TYPICAL CONCENTRATIONS	PACKAGINGS
• from 0.002 to 0.040% (ready-to-use sprays) • from 2% to 15% (concentrates) • multiple equilibria	• 750 ml sprays, 5, 10, 20, 60 l cans, 200 l drums, 1000 l IBCs and bulk packaging. • Available with safety couplers, safety caps, safety connectors.

TYPES

Concentrates:
- Foaming
- Non-foaming (without and with tracer)

Ready-to-use products

SUPPORT

At Christeyns, safety, health, environmental protection and regulatory compliance are integral to our operations. We ensure compliance with European and local legislative requirements.

With years of expertise in **biocidal product registrations**, our team of experts supports customers with various product registration options. Furthermore, our R&D team can assist with **product formulations and help determine the optimal composition for specific applications**. We are committed to helping you meet regulatory requirements and support you throughout the product registration process.

Christeyns, your trusted partner in maintaining industry-leading hygiene standards.
